

Mobile weigh bridge.

The **Mobile Weighbridge** is a fully certified weighbridge that is totally mobile, self-contained and can be set up at virtually any location in just 10 minutes. **The Mobile Weighbridge** has the ability to be placed directly in the path of vehicles. This reduces the transport costs otherwise incurred by having to travel to a fixed weighbridge installation.

- ✚ Shallow, only 31 cm high, compact modular weighbridge
- ✚ No special foundation required
- ✚ Robot-welded steel bridges in dismantling modules, with anti-corrosion, fluorescent paintwork.
- ✚ Bridge module, run-on ramps and support plates completely in high quality steel
- ✚ Version as guided scale – open in centre
- ✚ With short run-on ramps – only 3 m long!
- ✚ Rugged structure, yet may still be implemented flexibly
- ✚ Easy assembly, no major on-site preparatory work required
- ✚ Load cells are Verifiable, approved throughout world, precision class III, CE-symbol, fulfils OIML recommendations.
- ✚ Easy access for maintenance and cleaning due to centre opening along entire length of the bridge.
- ✚ Low cost due to specific omission of seldom-used components; no compromises are however made in terms of quality.
